

QUALITY SLITTING AND ZIPPER BAG MAKING MACHINES AT AFFORDABLE COSTS

Premiering at the Expo Pack trade show this year in Mexico City, Miller Packaging S.A. de C.V along with PEC Plastic Equipment Co. Ltd. will be demonstrating a high-speed slitting machine and zipper bag making machine. Please take time to visit us at booth 1120 during the Expo Pack show held from June 24th to 27th 2008. Both these machines are available as a pre-show special for companies in the market for reliable yet cost-effective converting equipment.

This shaftless SL-130WB slitter-rewinder is ideal for flexible packaging, laminates, metallized film, and contains a fully automatic tension control unit. All tension, speed, length information is controlled by a main touch screen operator interface.

Equipped with PLC controls, this servo-driven zipper bag machine offers efficient production outputs of up to 160 hits per min. depending on the material and thickness of bag. This GZR-900 model is a multifunctional bag making machine suitable for converting a wide range of polypropylene and polyethylene films. It provides for easy set-up and change over, automatic feeding and stop as well as photo-cell tracing functions.

SL-130WB SLITTING MACHINE

Technical Specifications

Thickness of film (mm)	12-100 microns
Max. roll width	1300mm
Min. roll width	400mm
Max. roll diameter	800mm
Raw material	LDPE, BOPP, PET, CPP, Laminates
Max. machine speed	300 metres/min
Rewind width (max.)	1000mm
Rewind width (min.)	50mm

*The values given in the data sheet are for information only but not binding.

GZR-900 ZIPPER BAG MAKING MACHINE

Machine Speed	30-160 T/Min
Bag length	10-850mm
Bag width	50-750mm
Error-tolerance	+/- 1 mm
Materials	LDPE, LLDPE, PP, etc.
Total power	5.5 kW
Machine weight	1500 kg
Machine dimensions	4500x1800x1700mm

*The values given in the data sheet are for information only but not binding.
